PROFESSIONAL SUMMARY

Senior Software Engineer with 3.5+ years at Optum (UnitedHealth Group) and an MBA in Finance, specializing in Java microservices, Spring Boot, and React.js. Beyond full-stack development, I design and build end-to-end **freelance automation systems for startups** — covering client onboarding, AI-powered proposal generation, invoice automation, and resume sync — enabling founders and solo professionals to run their business on autopilot. Available for freelance engagements in fintech, SaaS, and startup automation.

FREELANCE AUTOMATION SERVICES

I build custom automation systems for startups, freelancers, and small businesses — so you spend less time on admin and more time on growth.

- **Freelance OS (Full-Stack Automation Platform):** AI proposal generation (OpenAI), client onboarding flows, PDF invoice automation, follow-up email scheduling, and resume sync — Spring Boot + React.js.
- **CRM & Client Portals:** Custom CRM tools with role-based access, lead tracking, automated reminders, and client-facing dashboards.
- **API Integrations & Backend Automation:** Connect your tools (email, payments, Slack, Google Drive) via REST APIs and scheduled jobs.
- **Fintech & Business Dashboards:** Financial calculators, investor portals, and reporting dashboards — backed by MBA Finance domain knowledge.
- **WordPress Business Sites:** SEO-optimised websites for finance, SaaS, and service businesses with lead capture and analytics.

Platforms: Upwork · Fiverr · Direct Engagements

TECHNICAL SKILLS

Backend: Java, Spring Boot, Hibernate, REST APIs, Microservices, Node.js, JUnit, JSP

Frontend: React.js, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, TailwindCSS, Bootstrap, WordPress

Automation & AI: OpenAI API, Prompt Engineering, Spring @Scheduled, JavaMail, iText PDF, Workflow Automation

Database: MySQL, PostgreSQL, Oracle, SQL Server

Cloud & DevOps: GCP, AWS, Docker, Jenkins, GitHub Actions, CI/CD

Business & Finance: MBA Finance — Financial Modelling, Cost-Benefit Analysis, Client Management, Business Strategy

WORK EXPERIENCE

Senior Software Engineer | Optum | UnitedHealth Group

May 2026 – Present

- Promoted to Senior Software Engineer for consistent delivery, technical leadership, and ownership of business-critical modules.
- Lead backend architecture decisions for Java Spring Boot microservices supporting enterprise-scale release workflows.
- Drive technical design reviews, API contracts, and full-stack delivery across Java, Node.js, and React.js.
- Mentor junior and mid-level developers on microservice design, clean code, and CI/CD best practices.

Software Engineer (ASE-2) | Optum | UnitedHealth Group

2025 – May 2026

- Designed and developed an internal Release Management Tool using Java, Spring Boot, Hibernate, and Node.js, replacing SharePoint workflows and reducing approval cycle time significantly.
- Built Node.js REST microservices for asynchronous operations and backend utilities alongside core Java services.
- Redesigned internal portal UI with React.js and Bootstrap — improving responsiveness and user engagement across devices.
- Implemented JWT auth, authorization, input validation, and structured logging across Java and Node.js services.
- Drove cross-functional collaboration resulting in 25% increase in project throughput and 40% improvement in customer satisfaction.
- Identified and resolved 100+ production issues, boosting application reliability and user satisfaction by 30%.

Associate Software Engineer I | Optum | UnitedHealth Group

2022 – 2024

- Developed high-performance distributed applications using Spring Boot, JSP, Angular, and Bootstrap.
- Integrated RESTful APIs with front-end UIs and optimised SQL Server queries for performance and scalability.
- Conducted code reviews and promoted clean coding standards across the team.

Software Engineer Intern | Apisero

2021 – 2022

- Developed expertise in Salesforce, Snowflake, Java, HTML, CSS, jQuery, and JavaScript.

PROJECTS & BUILDS

FreelanceOS — Startup Automation Platform (In Progress)

- Full-stack automation platform for freelancers and startups — Spring Boot backend, React.js frontend, MySQL.
- Modules: AI proposal generator (OpenAI API), client onboarding with auto-emails (JavaMail), PDF invoice generation (iText), follow-up scheduler (Spring @Scheduled), and resume sync.
- Role-based access: Admin (freelancer) and Client portal. Deployed on GCP with CI/CD pipeline.

CRM Tool — Spring Boot + React.js + MySQL (In Progress)

- Full-stack CRM with lead tracking, role management (admin/client), and automated reminders on GCP.

InvestorVault — React + Spring Boot Investor Portal

- RBAC-based investor management portal with compound/simple interest calculations.

Auto Insurance Platform — Angular + Spring Boot + MySQL

- Scalable full-stack insurance management platform with end-to-end policy and claims management.

WordPress Business Website — Finance Company

- SEO-optimised business website with Elementor Pro — service pages, lead capture, analytics, responsive design.

EDUCATION

MBA — Finance

2023 – 2025

Financial Management, Business Strategy, Corporate Finance, and Marketing.

B.Tech — Computer Science | Noida Institute of Engineering & Technology

2018 – 2022
